## Two Greater Toy Stores Under the Same Roof!

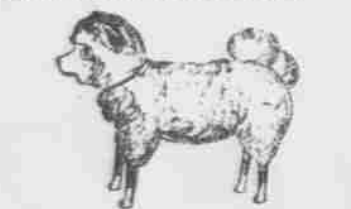

The basement stock burst its bounds of capacity, and we were forced to seek additional quarters for the overflow. Since instituting the new department on the third floor, the last of the season's purchases have arrived. The immensity of the stocks until collectively assembled was never calculated to be so great. It stands without a parallel—unlike any Washington has ever known. Grand—greater—broader—and largely bought. Both hemispheres have contributed liberally of their most novel and amusing contrivances for childish amusement. Our representative visited the leading marts of our own country, and secured the pick of the pack. It's toydom, the world in miniature, which is all so real to the children. The makers never created more clever or exercised greater ingenuity than is evident in our toys. All of these thousands of articles in this building do not represent half of this season's buying. In Baltimore we are wholesalers of toys; in Washington we retail on wholesale basis. We sell direct to you for the same prices local dealers pay for their stocks. Come see the wondrous products displayed here in St. Nicholas' show room, and bring along the children that they may see what he has in store for them. We have every facility and means of supplying all Washington, and, if necessary, families for miles around.
